

The legacy of the Class of 2023 at THS looks to be a strong class that overcame many challenges.

Polansky noted, "[The Class of 2023 will be remembered as] a class that went through one of the most difficult times in history and was resilient. They went through all this stuff, and it seems like the class is going to be ok [in the future.]"

O'Lare declared, "They are the class that began with Covid and ended with Covid. They had to experience their high school career like no other graduating class had to."

Phillips noted, "[They will be remembered] very fondly. For hard work and dedication while they were here."

Hartley commented, "[They will be remembered] as the group that challenged Mr. Phillips in Calculus BC."
